Founding Designer

Plasmic

2020–Present, Remote

- All interfaces and workflows for a multi-surface, no/low-code graphical (GUI) design and development tool, including some development and branding.
- Single Designer to a global team of over 14 incredible Engineers.

Product and Design Systems Designer

Facebook

xDesign + Core Systems

2018–2020, Menlo Park, CA

- Customer interview-driven design of an expansive AWS-like suite.
- Implementation of a new React-based design system and a total visual reshaping of many internal tools and products, including branding.
- Cross-company design services for various short-term, high-impact, often unassociated projects.
- Introduced and extended Figma to internal-facing design teams.
- Close collaboration with countless amazing PMs, Engineers, and Designers.

Lead Product and Visual Designer

Sourcegraph

2017–2018, San Francisco, CA

- User research interviews, storyboarding, wireframing, iconography, and high-fidelity visual workflows and prototypes.
- Marketing, sales, and growth project's design and development.
- Design team of mostly myself to a small team of brilliant Engineers.

Senior Product Designer

Zenefits

2016, San Francisco, CA

- Management of all requests and deliverables for 1 internal- and 3 customer-facing products, including large Payroll and PTO web applications.
- Extensive candidate interviews, hiring, and team growth/training.
- Fun, small Design team working with many fun PM and Engineering teams.

Senior Front-end Designer

SeamlessDocs + SeamlessGov

2014–2015, Miami, FL

- Complete UI/UX overhaul using Google's Material Design guidelines.
- Responsible for wireframing, mockups, rapid prototyping, and implementation of responsive and performant UI, typography, animations, with comprehensive style guides.
- Component-based design and front-end using Ember, Sass, BEM, SVGs, and reusable form, element, state, and validation standards.
